

DATA SCIENCE FOR SOCIAL GOOD
PORTUGAL

DSSG PT Presentation Event

Porto
12th June 2019

Agenda

18:30: 🤝 Meet & Greet

18:40: 🎤 Presentation of Data Science for Social Good Portugal

19:00: 🍺 Photo, Drinks & Networking

19:15: 🎤 Presentation of our first social good project with Rotaract Santo Tirso

19:35: 🎤 Presentation of our new project to be developed by volunteers

Thank you !

Data Science for Social Good Portugal

Data Science for Social Good Portugal is an open community of data scientists, data lovers and data enthusiasts that want to tackle problems that really matter. We believe in the power of data to transform our society for the better, for everyone.

Our goal is to connect people who have data skills with institutions that work on projects with social impact, such as charities, public administration and non-profits. Together, we help them collect and transform data into actionable knowledge to ultimately increase their impact. Our mission is to improve the future of society with today's data.

Mission and Values

We exist to leverage the power of data towards social good initiatives.

- Commitment
- Social Impact
- Data Drive
- Transparency
- Inclusiveness

DSSG Structure

Lead Team

In charge of:

- Communication
- Volunteers
- Beneficiaries
- Partners and Sponsors
- Project Managers
- Technical Leads

Volunteers

Data Enthusiasts and Social Good players that will transform social good challenges into viable and actionable products for the beneficiaries

Sponsors

Companies and institutions that will help us overcome our technological challenges and value data-driven initiatives

Beneficiaries

Non-profit organizations or companies, public or private, that will challenge us with real life social problems that can be tackled with data

Lead Team

Lead Team

Daniel Rodrigues

Inês Pereira

Tiago Freitas

Hugo Esteves

Inês Vigário

Bernardo Caldas

Dierê Fernandez

Miguel José Monteiro

Ana Ferreira

Lénia Mestrinho

Leid Zejnilovic

Lead Team

Communication

- Manages social media
- Manages communication strategy
- Creates graphical content

Beneficiaries

- Meets with beneficiaries and manages relationship
- Defines the scope of the projects
- Gathers more beneficiaries and projects

Volunteers

- Oversee volunteer selection process
- Manages volunteer relationship
- Organizes events for volunteers

Sponsors and Partners

- Guarantees financial stability of DSSG PT
- Manages relationship with partners

Project Managers / Tech Leads

- **Project Managers:** manage roadmap, deadlines and project lifecycle, report to Beneficiaries Team
- **Technical Leads:** lead the project teams and oversee technical viability of the project, report to Volunteers Team

Beneficiaries

Beneficiaries

Beneficiaries are institutions that work on projects with **social impact**, such as **charities**, **public administration** and **non-profits**.

These institutions are expected to have:

- Collected **data** or potential to do so
- **Availability** to collaborate in a project
- Willingness to have an **awesome data tool**

Social Good Use Cases

“Using Data to Create Paths out of Homelessness” - Wales, April 2018

- Analyzed demographics of homeless population using data from a organization
- Identified risk factors for homelessness
- Defined a strategy to improve the organization's strategy

“Expanding and implementing the Early Intervention System” - US, July 2015

- Analyzed risk factors for police officer violence and misconduct
- Build prototype model that predicted best officer to dispatch for certain event
- Built pipeline to ingest data and serve output

DataKind

Sponsors and Partners

Sponsors and Partners

Organizations who want to **contribute** directly, either financially or otherwise, to our cause and our projects and are **aligned with our mission and values**.

Data Science For Social Good

Summer Fellowship

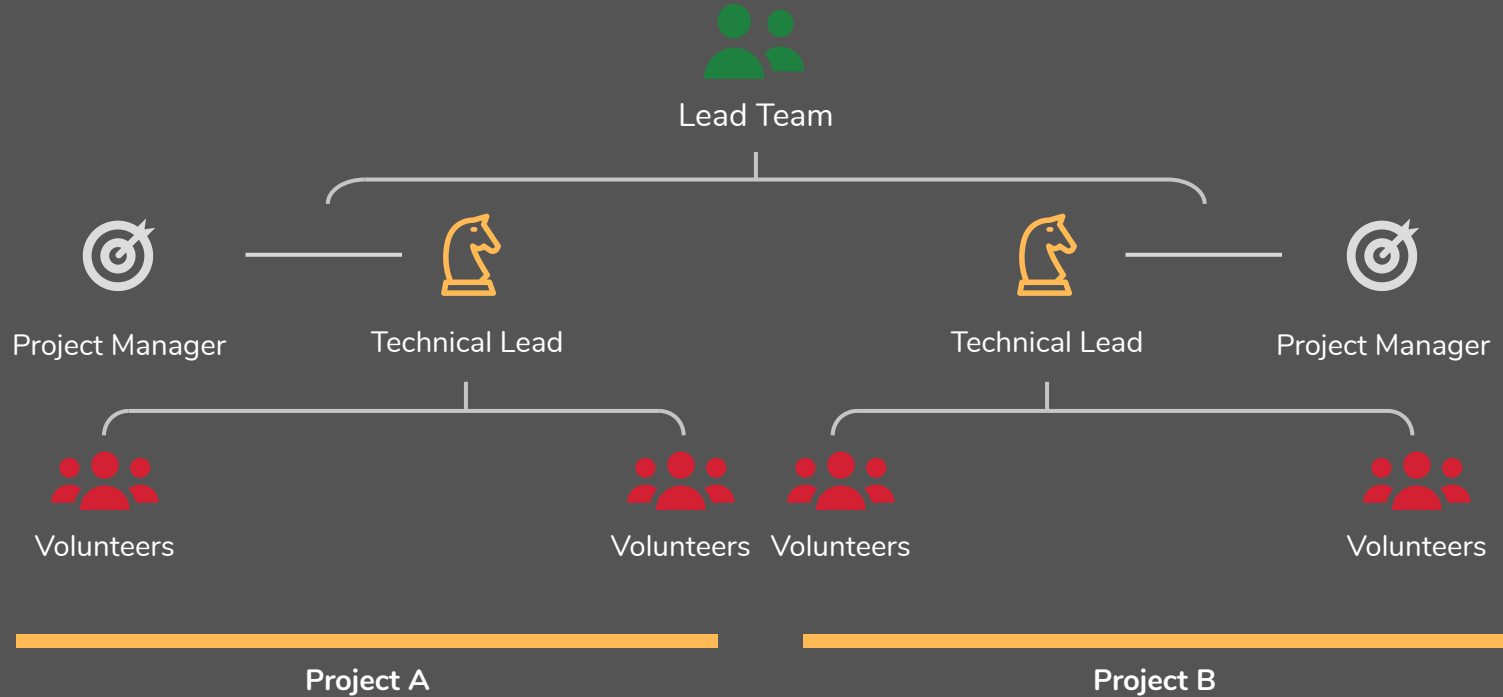

Volunteers

Volunteers

The perks of being a Volunteer

Our goal is to build, through our volunteers, a strong network of socially responsible data enthusiasts. We intend to provide you:

- **Social good projects:** work on a data science project for a non-profit
- **Learning events:** attend talks and workshops
- **Social good hackathons:** build a prototype for a social challenge
- **Networking events**
- The possibility of **publishing and promoting** all the innovation generated

What is expected from a Volunteer

Our goal is to build, through our volunteers, a strong network of socially responsible data enthusiasts. We expect that you:

- **Commit** exactly the time you promised. No more, no less
- **Report**, communicate and solve issues with your team - you have autonomy
- Always have the **beneficiary's best interest** in mind
- **Learn**, have **fun**, meet **new people** and make the world a **better place!**

Join us!
